LAB2

To be presented on november 14th lab hours.

Num1 = DB (=11011011)

Num2 = AE (=10101110)

a) Pick 6 and 7th bits of num1 10
b) Replicate 2 times 1010
c) Pick first three bits of num1 011
d) Pick first 4 bits of num2 1110
e) Concatenate d,c, and b -> [1110 011 1010]
f) Divide concatenated number by constant 110010
g) Verilog module (dataflow), RTL scheme, Testbench, Simulation

Result = 100101 = h25
