Q1

Student ID → xx ... 4 3 2 1

last four digits

$$A = \left[\left(1 \right) + 1 \right] = 2$$

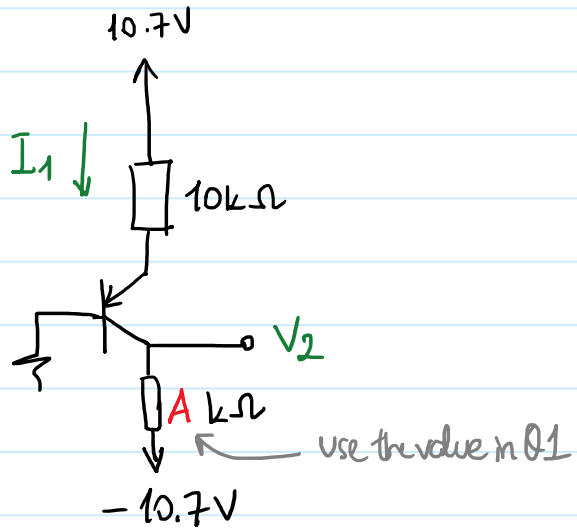

fixed

$$A = \boxed{?}$$

Write only the answer, no calculations!!!

Q2

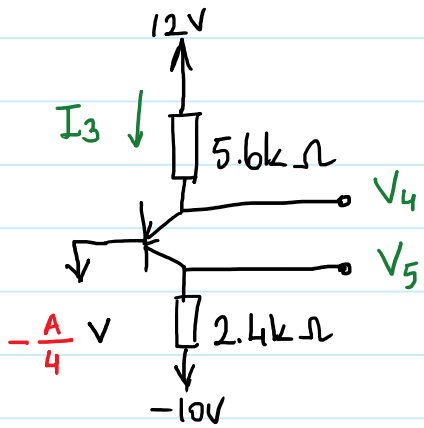

Assume β is very large. Find the unknowns.
(The parameter A is calculated in Q1. Round your result to the nearest integer.)

$I_1 =$ [?] μA

$V_2 =$ [?] mV

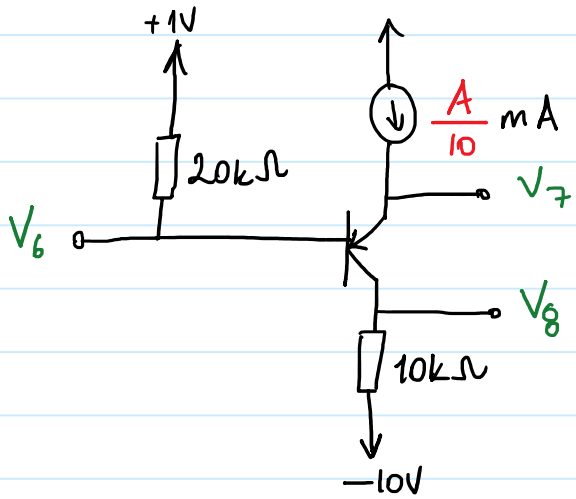

Round [?] to the nearest integer value.

$I_3 =$ [?] μA

$V_4 =$ [?] mV

$V_5 =$ [?] mV

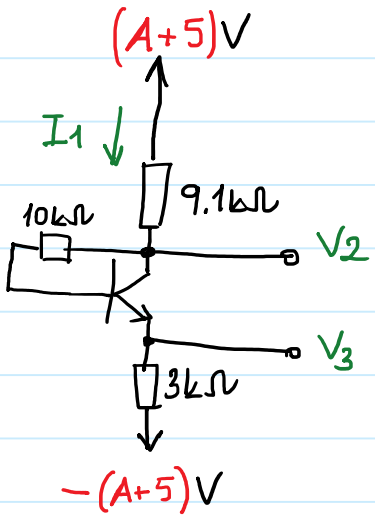

$V_6 =$ [?] mV

$V_7 =$ [?] mV

$V_8 =$ [?] mV

Q3

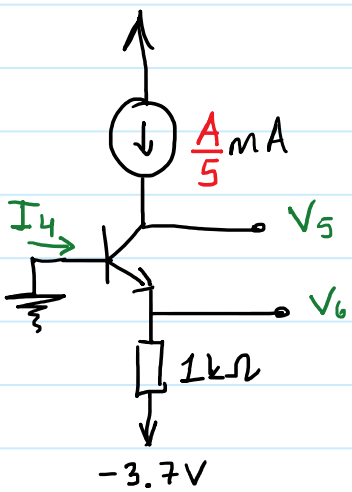

Assume β is very large. Find the unknowns.
(The parameter A is calculated in Q1. Round your result to the nearest integer.)

$I_1 =$ [?] μA

$V_2 =$ [?] mV

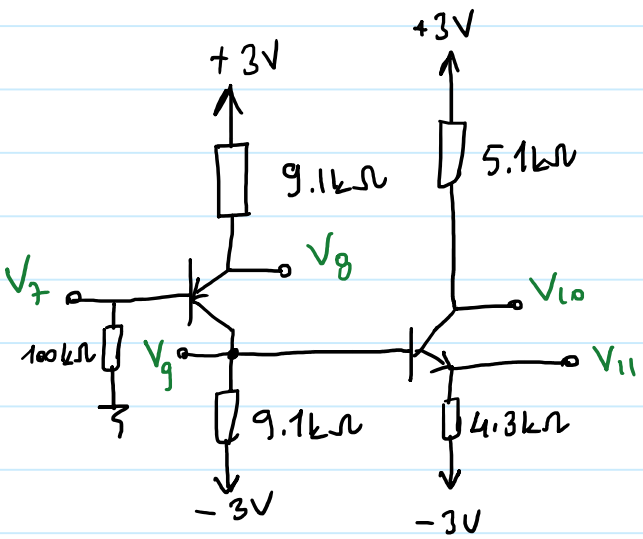

$V_3 =$ [?] mV

$I_4 =$ [?] μA

$V_5 =$ [?] mV

$V_6 =$ [?] mV

$V_7 =$ [?] mV

$V_8 =$ [?] mV

$V_9 =$ [?] mV

$V_{10} =$ [?] mV

$V_{11} =$ [?] mV

Q4

Assuming β=100, repeat Q2

Q5

Assuming β=100, repeat Q3
