Basic info about the course (CSE2062 – EE1004)

- Name: Object-Oriented programming (OOP)
- Aim: To teach object-oriented programming skills and Java Concepts
- Course web site:

  http://onlinesorular.com/

  There is no need to buy any Textbook
  - But follow: *Liang, Introduction to Java Programming and Data Structures, Twelfth Edition, Global Edition, Copyright © 2022 Pearson Education Ltd*
- 5 hours of class every week
  - 3-hour lectures (lectured by the instructor)
    - 1 Lecture Hour: Monday, 11:30 – 12:20 (in the morning)
    - 2 Lecture Hours: Monday, 15:00 – 16:50 (in the afternoon)
  - 2-hour lab (taught by TA (Oğuzhan Çiftçi)), there are two sections:
    - Section-1 => Tuesday, 13:00 – 14:50 (in the afternoon)
    - Section-2 => Tuesday, 15:00 – 16:50 (in the afternoon)
    - CSE2062 Students: Lab attendance is not mandatory

Grading Policy

- Midterm 60%
- Final 40%

- According to Marmara University regulations, you must take at least 35/100 points in the final exam and your overall average should be >= 35/100 in order to pass this course

Exams and labs

- Both midterm and final exams will be held on computers.
  - Maybe online, maybe in class?
- Results will be announced just after the quiz
- You can review your paper a few minutes after the quiz.
- Attendance taken in both classes and labs.
  - 70% attendance for the lectures
  - 80% attendance for the labs

Course outline

Week-1 : Introduction to Computers, Programs, and Java
Week-2 : Elementary Java Programming
Week-3 : Selections: If-Else & Operators
Week-4 : Mathematical Functions, Characters, and Strings
Week-5 : Loops
Week-6 : Methods
Week-7 : Single-Dimensional & Multidimensional Arrays
Week-8 : Objects and Classes
Week-9 : Thinking in Objects
Week-10: Inheritance and Polymorphism
Week-11: Exception Handling and Text IO
Week-12: Abstract Classes and Interfaces
Week-13: Binary I/O (Ch. 17)
Week-14: Generics (Ch. 19)
Week-15: Lists, Stacks, Queues, and Priority Queues (Ch. 20)
Week-16: Sets and Maps (Ch. 20)
Week-17: Hashing (Ch. 27)

Topics not covered:

- JavaFX Basics
- Event-Driven Programming and Animations
- JavaFX UI Controls and Multimedia
- Recursion
- Multithreading and Parallel Programming
- Networking
- Database
- Internationalization
- Servlets
- JavaServer Page (JSPs)
- Webservices & WSDL
- JUnit
