Started on	Monday, 9 March 2026, 9:44 AM
State	Finished
Completed on	Monday, 9 March 2026, 10:08 AM
Time taken	23 mins 42 secs
Grade	**53.25** out of 100.00

Question 1

Incorrect

Mark 0.00 out of 2.00

Which of the following statements is correct?

Select one:

- A. Every class must end with a semicolon. ✖
- B. Every method must end with a semicolon.
- C. Every line in a program must end with a semicolon.
- D. Every statement in a program must end with a semicolon.
- E. Every comment line must end with a semicolon.

Only statements need to end with a semicolon.

The correct answer is: Every statement in a program must end with a semicolon.

Question 2

Correct

Mark 3.00 out of 3.00

Which of the following lines is not a Java comment? Please select all that apply.

Select one or more:

- A. // comments
- B. -- comments ✔ The text that begins with // in a line is known as a line comment and the text that is enclosed between /* and */ is known as a paragraph comment.
- C. /** comments */ ✖
- D. /* comments */
- E. ** comments ** ✔ The text that begins with // in a line is known as a line comment and the text that is enclosed between /* and */ is known as a paragraph comment.

The text that begins with // in a line is known as a line comment and the text that is enclosed between /* and */ is known as a paragraph comment.

The text that begins with // in a line is known as a line comment and the text that is enclosed between /* and */ is known as a paragraph comment.

The correct answers are: -- comments, ** comments **

Question 3

Correct

Mark 2.00 out of 2.00

A program and its data must be moved into the computer's _____ before they can be executed by the CPU.

Select one:

- A. memory ✔ See the first paragraph in Section 1.2.3.
- B. hard disk
- C. CD-ROM
- D. CPU

See the first paragraph in Section 1.2.3.

See the first paragraph in Section 1.2.3.

The correct answer is: memory

Question 4

Incorrect

Mark 0.00 out of 3.00

What is the output of the following code?

```
System.out.println("1 + 2 + 3");
System.out.println(1 + 2 + 3);
```

Select one:

- A. 1 + 2 + 3 followed by 6
- B. "6" followed by 6
- C. 1 + 2 + 3 followed by 1 + 2 + 3 ✖
- D. 6 followed by 6

"1 + 2 + 3" is a string. 1 + 2 + 3 is an expression, which evaluates to 6. So, the answer is A.

The correct answer is: 1 + 2 + 3 followed by 6

Question 5

Correct

Mark 2.00 out of 2.00

Why do computers use zeros and ones?

Select one:

- A. Because binary numbers are simplest.
- B. Because combinations of zeros and ones can represent any numbers and characters.
- C. Because binary numbers are the bases upon which all other number systems are built.
- D. Because digital devices have two stable states and it is natural to use one state for 0 and the other for 1. ✔ See the second paragraph in Section 1.2.2.

See the second paragraph in Section 1.2.2.

See the second paragraph in Section 1.2.2.

The correct answer is: Because digital devices have two stable states and it is natural to use one state for 0 and the other for 1.

Question 6

Incorrect

Mark 0.00 out of 2.00

Which JDK command is correct to run a Java application in ByteCode.class?

Select one:

- A. java ByteCode
- B. java ByteCode.class ✖
- C. javac ByteCode.java
- D. javac ByteCode
- E. JAVAC ByteCode

A is correct. In B, to compile, use only the class name, not including the extension. In C, javac is the command to compile a class, not to run a class. In D, javac is the command to compile a class, not to run a class. In E, the command is case sensitive and javac is the command to compile a class, not to run a class.

The correct answer is: java ByteCode

Question 7

Correct

Mark 2.00 out of 2.00

The following code has _____.

```
public class Test {
  public static void main(string[] args) {
    System.out.println("Welcome to Java!");
  }
}
```

Select one:

- A. a compile error ✔ string should be spelled String with S in capital in line 2 "main(string[] args)". The compiler reports an error that string is not recognized.
- B. a runtime error
- C. a logic error

string should be spelled String with S in capital in line 2 "main(string[] args)". The compiler reports an error that string is not recognized.

string should be spelled String with S in capital in line 2 "main(string[] args)". The compiler reports an error that string is not recognized.

The correct answer is: a compile error

Question 8

Correct

Mark 2.00 out of 2.00

One gigabyte is approximately _____ bytes.

Select one:

- A. 1 million
- B. 1 billion ✔ See the fifth paragraph in Section 1.2.2.
- C. 1 trillion
- D. 10 million

See the fifth paragraph in Section 1.2.2.

See the fifth paragraph in Section 1.2.2.

The correct answer is: 1 billion

Question 9

Incorrect

Mark 0.00 out of 3.00

The following code has _____.

```
public class Test {
  public static void main(String[] args) {
    System.out.println(&amp;#34;Welcome to Java!);
  }
}
```

Select one:

- A. a compile error
- B. a runtime error
- C. a logic error ✖

The closing quotation mark is missing in Welcome to Java!, which is a syntax error. The compiler reports the error that the quotation is not closed.

The correct answer is: a compile error

Question 10

Incorrect

Mark 0.00 out of 2.00

_____ is an operating system.

Select one:

- A. Ada
- B. Java ✖
- C. Visual Basic
- D. Windows
- E. C++

See the first paragraph in Section 1.4.

The correct answer is: Windows

Question 11

Incorrect

Mark 0.00 out of 2.00

The JDK command to just compile a class (not run) in the file Test.java is _____.

Select one:

- A. java Test
- B. java Test.java
- C. javac Test.java
- D. javac Test
- E. JAVAC Test.java ✖

In A, java is the command to run a program. In B, java is the command to run a program. In D, java is the command to run a program. In E, The command is case sensitive. C is correct.

The correct answer is: javac Test.java

Question 12

Incorrect

Mark 0.00 out of 2.00

The speed of the CPU may be measured in _____. Please select all that apply.

Select one or more:

- A. gigabytes ✖
- B. megahertz
- C. megabytes ✖
- D. gigahertz

See the third paragraph in Section 1.2.1. 1 megahertz equals 1 million pulses per second and 1 gigahertz is 1000 megahertz.

The correct answers are: megahertz, gigahertz

Question 13

Incorrect

Mark 0.00 out of 2.00

_____ are instructions to the computer. Please select all that apply.

Select one or more:

- A. Programs
- B. Hardware ✖
- C. Software
- D. Keyboards

See the Key Point in Section 1.3.

The correct answers are: Software, Programs

Question 14

Correct

Mark 3.00 out of 3.00

_____ contains predefined classes and interfaces for developing Java programs.

Select one:

- A. Java language specification
- B. Java API ✔ See the last paragraph in Section 1.6.
- C. Java JDK
- D. Java IDE

See the last paragraph in Section 1.6.

See the last paragraph in Section 1.6.

The correct answer is: Java API

Question 15

Correct

Mark 3.00 out of 3.00

The main method header is written as _____.

Select one:

- A. public static void main(string[] args)
- B. public static void Main(String[] args)
- C. public static void main(String[] args) ✔ In A, string should be spelled String with S in uppercase. In B, Main should be spelled main in lowercase. In D, the keyword void is missing. In E, the keyword static is missing. C is correct.
- D. public static main(String[] args)
- E. public void main(String[] args)

In A, string should be spelled String with S in uppercase. In B, Main should be spelled main in lowercase. In D, the keyword void is missing. In E, the keyword static is missing. C is correct.

In A, string should be spelled String with S in uppercase. In B, Main should be spelled main in lowercase. In D, the keyword void is missing. In E, the keyword static is missing. C is correct.

The correct answer is: public static void main(String[] args)

Question 16

Correct

Mark 3.00 out of 3.00

The extension name of a Java bytecode file is _____.

Select one:

- A. .exe
- B. .java
- C. .class ✔ .java is the Java source code file name and .class is the Java bytecode file name.
- D. .obj

.java is the Java source code file name and .class is the Java bytecode file name.

.java is the Java source code file name and .class is the Java bytecode file name.

The correct answer is: .class

Question 17

Incorrect

Mark 0.00 out of 2.00

_____ consists of a set of separate programs for developing and testing Java programs, each of which is invoked from a command line.

Select one:

- A. Java language specification
- B. Java API
- C. Java JDK
- D. Java IDE ✖

See the last paragraph in Section 1.6.

The correct answer is: Java JDK

Question 18

Incorrect

Mark 0.00 out of 3.00

A block is enclosed inside _____.

Select one:

- A. braces
- B. parentheses
- C. brackets ✖
- D. quotes

A block is enclosed inside a pair of openning and closing braces.

The correct answer is: braces

Question 19

Incorrect

Mark 0.00 out of 2.00

Computer can execute the code in _____.

Select one:

- A. machine language
- B. assembly language ✖
- C. high-level language
- D. None of these

See the first paragraph in Section 1.3.1.

The correct answer is: machine language

Question 20

Correct

Mark 2.00 out of 2.00

Which of the following code has the best style?

I:
```
public class Test {
public static void main(String[] args) {
   System.out.println("Welcome to Java!");
  }
}
```

II:
```
public class Test {
   public static void main(String[] args) {
   System.out.println("Welcome to Java!");
  }
}
```

III:
```
public class Test {
  public static void main(String[] args) {
  System.out.println("Welcome to Java!");
  }
}
```

IV:
```
public class Test {
  public static void main(String[] args) {
    System.out.println("Welcome to Java!");
  }
}
```

Select one:

- A. I
- B. II
- C. III
- D. IV ✔ All the code will run fine, but not all of them are formatted correctly. Only the code in IV is formatted correctly.

All the code will run fine, but not all of them are formatted correctly. Only the code in IV is formatted correctly.

All the code will run fine, but not all of them are formatted correctly. Only the code in IV is formatted correctly.

The correct answer is: IV

Question 21

Correct

Mark 2.00 out of 2.00

_____ is interpreted.

Select one:

- A. Java ✔ See the second paragraph in Section 1.5.
- B. C++
- C. C
- D. Pascal
- E. Ada

See the second paragraph in Section 1.5.

See the second paragraph in Section 1.5.

The correct answer is: Java

Question 22

Partially correct

Mark 2.25 out of 3.00

Which of the following are the reserved words? Please select all that apply.

Select one or more:

- A. void ✔ These are all reserved words with specific meaning to the compiler.
- B. public ✔ These are all reserved words with specific meaning to the compiler.
- C. static
- D. class ✔ These are all reserved words with specific meaning to the compiler.

These are all reserved words with specific meaning to the compiler.

The correct answers are: public, static, void, class

Question 23

Incorrect

Mark 0.00 out of 2.00

_____ is the physical aspect of the computer that can be seen.

Select one:

- A. Operating system ✖
- B. Software
- C. Application program
- D. Hardware

See the first paragraph in Section 1.2.

The correct answer is: Hardware

Question 24

Correct

Mark 2.00 out of 2.00

Which of the following are storage devices? Please select all that apply.

Select one or more:

- A. flash stick ✔ See the second paragraph in Section 1.2.4.
- B. portable disk ✔ See the second paragraph in Section 1.2.4.
- C. hard disk ✔ See the second paragraph in Section 1.2.4.
- D. CD-ROM ✔ See the second paragraph in Section 1.2.4.

See the second paragraph in Section 1.2.4.

See the second paragraph in Section 1.2.4.

The correct answers are: portable disk, hard disk, flash stick, CD-ROM

Question 25

Incorrect

Mark 0.00 out of 2.00

_____ is a software that interprets Java bytecode.

Select one:

- A. Java compiler ✖
- B. Java debugger
- C. Java API
- D. Java virtual machine

Java virtual machine is a software that runs Java bytecode. Java compiler compiles Java source code into Java bytecode.

The correct answer is: Java virtual machine

Question 26

Correct

Mark 3.00 out of 3.00

_____ is not an object-oriented programming language.

Select one:

- A. Java
- B. C++
- C. Python
- D. C ✔ See Table 1.1 in Section 1.3.1.
- E. C#

See Table 1.1 in Section 1.3.1.

See Table 1.1 in Section 1.3.1.

The correct answer is: C

Question 27

Incorrect

Mark 0.00 out of 2.00

Java compiler translates Java source code into _____.

Select one:

- A. another high-level language code
- B. assembly code ✖
- C. machine code
- D. Java bytecode

Java bytecode is the end result of compiling a Java source file. Java bytecode is machine-independent and can be run on any platform.

The correct answer is: Java bytecode

Question 28

Correct

Mark 3.00 out of 3.00

Every statement in Java ends with _____.

Select one:

- A. an asterisk (*)
- B. a semicolon (;) ✔ You have to tell the compiler where a statement ends using a semicolon.
- C. a period (.)
- D. a comma (,)

You have to tell the compiler where a statement ends using a semicolon.

You have to tell the compiler where a statement ends using a semicolon.

The correct answer is: a semicolon (;)

Question 29

Correct

Mark 2.00 out of 2.00

One byte has _____ bits.

Select one:

- A. 16
- B. 8 ✔ See the third paragraph in Section 1.2.2.
- C. 12
- D. 4

See the third paragraph in Section 1.2.2.

See the third paragraph in Section 1.2.2.

The correct answer is: 8

Question 30

Correct

Mark 2.00 out of 2.00

Programming style is important, because _____. Please select all that apply.

Select one or more:

- A. a program may not compile if it has a bad style ✖
- B. good programming style can make a program run faster ✖
- C. good programming style makes a program more readable ✔ Bad style is a readability issue. The code will still compile. Programming style is a readability issue and it does not effect the performance of the code. D and C are correct.
- D. good programming style helps reduce programming errors ✔ Bad style is a readability issue. The code will still compile. Programming style is a readability issue and it does not effect the performance of the code. D and C are correct.

Bad style is a readability issue. The code will still compile. Programming style is a readability issue and it does not effect the performance of the code. D and C are correct.

Bad style is a readability issue. The code will still compile. Programming style is a readability issue and it does not effect the performance of the code. D and C are correct.

The correct answers are: good programming style makes a program more readable, good programming style helps reduce programming errors

Question 31

Correct

Mark 3.00 out of 3.00

If a program compiles fine, but it produces incorrect result, then the program suffers _____.

Select one:

- A. a compile error
- B. a runtime error
- C. a logic error ✔ If a program has a compile error, it will not run. When a program has a runtime error, it terminates abnormally. C is correct.

If a program has a compile error, it will not run. When a program has a runtime error, it terminates abnormally. C is correct.

If a program has a compile error, it will not run. When a program has a runtime error, it terminates abnormally. C is correct.

The correct answer is: a logic error

Question 32

Correct

Mark 2.00 out of 2.00

_____ is architecture-neutral.

Select one:

- A. C++
- B. Java ✔ See the second paragraph in Section 1.5.
- C. Ada
- D. Pascal
- E. C

See the second paragraph in Section 1.5.

See the second paragraph in Section 1.5.

The correct answer is: Java

Question 33

Incorrect

Mark 0.00 out of 2.00

_____ is a technical definition of the language that includes the syntax and semantics of the Java programming language.

Select one:

- A. Java language specification
- B. Java API
- C. Java JDK
- D. Java IDE ✖

See the last paragraph in Section 1.6.

The correct answer is: Java language specification

Question 34

Correct

Mark 2.00 out of 2.00

A computer's _____ is volatile; that is, any information stored in it is lost when the system's power is turned off.

Select one:

- A. hard disk
- B. memory ✔ See the first paragraph in Section 1.2.4.
- C. CD-ROM
- D. flash stick

See the first paragraph in Section 1.2.4.

See the first paragraph in Section 1.2.4.

The correct answer is: memory

Question 35

Correct

Mark 2.00 out of 2.00

Which of the following statements is correct to display Welcome to Java on the console?

Select one:

- A. System.out.println('Welcome to Java');
- B. System.out.println("Welcome to Java"); ✔ In A, a string must be enclosed in double quotation marks. In C, a string must be enclosed in double quotation marks and also the .out is missing. In D, a string must be enclosed in double quotation marks on both sides. In E, a string must be enclosed in double quotation marks. B is correct.
- C. System.println('Welcome to Java');
- D. System.out.println('Welcome to Java");
- E. System.out.println("Welcome to Java');

In A, a string must be enclosed in double quotation marks. In C, a string must be enclosed in double quotation marks and also the .out is missing. In D, a string must be enclosed in double quotation marks on both sides. In E, a string must be enclosed in double quotation marks. B is correct.

In A, a string must be enclosed in double quotation marks. In C, a string must be enclosed in double quotation marks and also the .out is missing. In D, a string must be enclosed in double quotation marks on both sides. In E, a string must be enclosed in double quotation marks. B is correct.

The correct answer is: System.out.println("Welcome to Java");

Question 36

Incorrect

Mark 0.00 out of 3.00

Suppose you define a Java class as follows, the source code should be stored in a file named _____.

```
public class Test {

}
```

Select one:

- A. Test.class ✖
- B. Test.doc
- C. Test.txt
- D. Test.java
- E. Any name with extension .java

You have to name the class as ClassName.java. Here the class name is Test.

The correct answer is: Test.java

Question 37

Incorrect

Mark 0.00 out of 2.00

_____ is the brain of a computer.

Select one:

- A. CPU
- B. Memory
- C. Disk ✖
- D. Hardware

See the first paragraph in Section 1.2.1.

The correct answer is: CPU

Question 38

Incorrect

Mark 0.00 out of 2.00

_____ provides an integrated development environment (IDE) for rapidly developing Java programs. Editing, compiling, building, debugging, and online help are integrated in one graphical user interface.

Select one:

- A. Java language specification ✖
- B. Java API
- C. Java JDK
- D. Java IDE

See the last paragraph in Section 1.6.

The correct answer is: Java IDE

Question 39

Correct

Mark 2.00 out of 2.00

_____ translates high-level language program into machine language program.

Select one:

- A. A compiler ✔ See the first paragraph after Table 1.1 in Section 1.3.3.
- B. The operating system
- C. An assembler
- D. CPU

See the first paragraph after Table 1.1 in Section 1.3.3.

See the first paragraph after Table 1.1 in Section 1.3.3.

The correct answer is: A compiler

Question 40

Incorrect

Mark 0.00 out of 3.00

Analyze the following code.

I:
```
public class Test {
  public static void main(String[] args) {
    System.out.println("Welcome to Java!");
  }
}
```

II:
```
public class Test { public static void main(String[] args) {
System.out.println("Welcome to Java!"); } }
```

Select one:

- A. Only the code in II can compile and run and display Welcome to Java.
- B. Both I and II can compile and run and display Welcome to Java, but the code in II has a better style than I. ✖
- C. Only the code in I can compile and run and display Welcome to Java.
- D. Both I and II can compile and run and display Welcome to Java, but the code in I has a better style than II.

Both I and II are the same except the format is different. Format is a readability issue only.

The correct answer is: Both I and II can compile and run and display Welcome to Java, but the code in I has a better style than II.

Question 41

Incorrect

Mark 0.00 out of 3.00

The extension name of a Java source code file is _____.

Select one:

- A. .exe
- B. .obj ✖
- C. .class
- D. .java

.java is the Java source code file name and .class is the Java bytecode file name.

The correct answer is: .java

Question 42

Correct

Mark 2.00 out of 2.00

_____ is a program that runs on a computer to manage and control a computer's activities.

Select one:

- A. Compiler
- B. Interpreter
- C. Modem
- D. Operating system ✔ See the first paragraph in Section 1.4.
- E. Java

See the first paragraph in Section 1.4.

See the first paragraph in Section 1.4.

The correct answer is: Operating system

Question 43

Correct

Mark 2.00 out of 2.00

The _____ specifies the number of pixels in horizontal and vertical dimensions of the display device.

Select one:

- A. monitor
- B. screen resolution ✔ See the third last paragraph in Section 1.2.5.
- C. dot pitch
- D. pixel

See the third last paragraph in Section 1.2.5.

See the third last paragraph in Section 1.2.5.

The correct answer is: screen resolution
