LEADERSHIP & MANAGEMENT

by ÖZLEM YILMAZ

EMOTIONS & EQ…

- The Need for;
  - Survival
  - Purpose
  - Esteem

Emotional engagement

Rational engagement

Trust is what rolls the leadership hoop!

Logic & cause-effect realations

- EQ is understanding your own and other people's emotional makeup well enough to **communicate effectively, to overcome challenges and to defuse conflict**

EQ, SINE QUA NON OF LEADERSHIP

Motivation	• A passion to work for reasons that go beyond money and status • A propensity to pursue goals with energy and persistence • Strong drive to achieve • Optimism, even in the face failure • Commitment
Empathy	• The ability to understand the emotional makeup of other people • Skill in treating people according to their emotional reactions • Cross-cultural sensitivity
Social skills	• Persuasiveness • Effectiveness in leading change • Expertise in building and leading teams • Managing relationships • Building networks
Self-awareness	• Self-confidence • Ability to recognize the mood, and emotion of self
Self regulation	• Trustworthiness • Comfort with ambiguity

…CAPTURING THE MINDS, HEARTS & SPIRITS

"The challenge of leadership is to be strong, but not rude; be kind, but not weak; be bold, but not bully; be thoughtful, but not lazy; be humble, but not timid; be proud, but not arrogant; have humor, but without folly." –Jim Rohn, entrepreneur and motivational speaker

Leadership is highly multi-dimensional. The leadership theories are based on different ways of thinking. Some focus on traits and qualities, some touch the importance of situational aspects that influence how leaders behave

1. **Transformational Leadership Theory**
2. **Situational Leadership Theory**
3. **Transactional Leadership Theory**
4. **Behavioral Leadership Theory**
5. **Great Man Theory of Leadership**
6. **Trait Theory of Leadership**

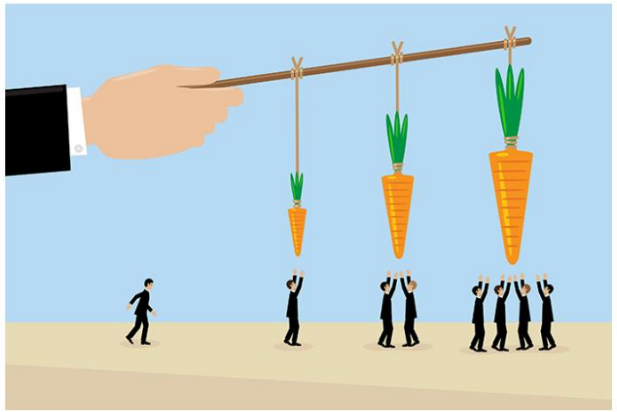

«if you think your teacher is tough wait till you get a boss»

- ***«if you think your teacher is tough wait till you get a boss»***

- Bill Gates is not known for engaging or adaptive communication. Rather, he is well known to be rude, abrasive, and sometimes dismissive of others' ideas. He once stated his hiring practice as, "I don't hire bozos," who will tell me how to run my business, and demonstrated foresight in his hiring by actively selecting dedicated, hard-working individuals at the initial development stages of Microsoft.
- Confrontational taskmaster; Microsoft was a high-stress environment because Bill drove others as hard as he drove himself. He was growing into the taskmaster who would prowl the parking lot on weekends to see who'd made it in. People were already busting their tails, and it got under their skin when Bill hectored them into doing more. Bill liked to hash things out in intense, one-on-one discussions; he thrived on conflict and wasn't shy about instigating it. Being a task-oriented leader he helped the team understand their goal by providing a series of steps that structure their initial meetings. He said "I believe that if you show people the problems and if you show them the solutions they will be moved to act".

TRANSACTIONAL LEADERSHIP…

- …was first described by Max Weber in 1947, then by Bernard Bass in 1981
- …is most often used by the managerial leaders
- …focuses on **controlling, organizing, and short-term planning**
- …consider **rewards and punishments** as the basis for actions
  - if the follower does what is desired, a reward will follow
  - if he does not, a punishment will follow

- …the power of transactional leaders comes from **their formal authority** and **responsibility/position power**
- …the main goal of the follower is to **obey the instructions**, telling style

TRANSACTIONAL LEADERSHIP…

- The transactional leaders,
  - …overemphasize detailed and short-term goals
  - …are highly directive and action oriented
  - …their relationsip with the followers is transitory and not based on emotional bonds
  - …do not make an effort to enhance followers' creativity and generation of new ideas
  - …are effective in guiding efficiency decisions which are aimed at cutting costs and improving productivity
- Transactional leader brings followers together on a joint purpose of the goal. They are the who supervise and organize the followers in such a way that the performance of the team is not affected and the goal is achieved, for every achievement there are some reward and punishment on the failure.

BEHAVIORAL THEORY…

- … leaders are **made, not born**
  - … are made through a series of experiences, knowledge
  - …can be created based on learnable **behavior**
  - …leadership can be learned through experience, teaching, and observation and opportunities that lead to "conditioned responses"
- …focuses on the actions of leaders not on mental qualities or internal states
  - …the evidence of leadership is the demonstrated activities
- …states that the leader uses three skills to lead his followers;
  - …**technical**, knowledge of the process of technique
  - …**human**, ability to interact with people
  - …**conceptual,** ideas which enable a manager to set up models and design plans

GREAT MAN THEORY...

- ... intrduced by Thomas Carlyle in 19th century *"The history of the world is but the biography of great men"*
- ...based on the assumption that leaders are "born" rather than "made"
- ...emphasizes leadership as a quality that you either possess or you don't; it isn't something that you can learn
- ...according to this theory, a person capable of leading has the personality traits of a leader — charm, confidence, intellect, communication skills, and social aptitude — from birth, which set them apart.
- ...pretty discouraging to those wanting to learn the ropes of leadership,

This theory has been dismissed by the most modern theorists. However, it is interesting that the qualities of great/extraordinary leaders remained more or less unchanged over time.

TRAIT THEORY…

- …believes that **leadership** is largely innate, rather than being developed through learning
- … walks in the footsteps of the Great Man theory, assuming that leaders are born with traits that make them more suitable for the role of a leader
  - ***Charisma, creativity*** and ***flexibility***
  - ***Achievement drive:*** high level of effort, high levels of ambition, energy and initiative
  - ***Leadership motivation:*** an intense desire to lead others to reach shared goals
  - ***Honesty and integrity****:* trustworthy, reliable, and open
  - ***Self-confidence:*** belief in one's self, ideas, and ability
  - ***Cognitive ability:*** capable of exercising good judgment, strong analytical abilities and conceptually skilled
  - ***Emotional maturity:*** well adjusted, does not suffer from severe psychological disorders.

SITUATIONAL LEADERSHIP…

"Effective leadership is about striking the right balance between needs, context, and behavior." *by leadership researchers White and Hodgson*

- The best leaders have not only the right traits but also the ability to ***assess the needs of their followers, analyze the situation and act accordingly***.
  - …different situations demand different styles of leadership and decision-making
  - …a leader must act by judging the situation they are facing
  - …a leader must be able to adapt his style and approach to diverse circumstances

- Two approaches;
  - Paul Hersey and Ken Blanchard's **Situational Leadership Theory**
  - Daniel Goleman's **Model of Situational Leadership**

	Coercive	Authoritative	Affiliative	Democratic	Pacesetting	Coaching
Modus Operandi of the Leader	Demands immediate compliance	Mobilizes people toward a vision	Creates harmony and builds emotional bonds	Forges consensus through participation	Sets high standards of performance	Develops people for the future
The style in a phrase	'Do what I tell you'	'Come w me'	'People come first'	'What do you think?'	'Do as I do, now'	'Try this'
Underlying EQ component	Drive to achieve, initiative, self-control	Self-confidence, empathy, change catalyst	Empathy, building relationships, communication	Collaboration, team leadership, communication	Conscientiousness, drive to achieve, initiative	Developing others, empathy, self-awareness
When the style works best	In a crisis, to kick start of a turnaround, or w problem subordinates	When changes require a new vision, or when a clear direction is needed	To heal rifts in a team or to motivate people during stressful circumstances	To build buy-in or consensus or to get input from valuable subordinates	To get quick results from a highly motivated or competent team	To help the person improve performance or develop long term strengths
Overall impact on climate	Negative	Most strongly positive	Positive	Positive	Positive	Positive

THE COERCIVE STYLE

- ...the extreme top down decision making kills new ideas on the vine
- ...people feel so disrespected that they think 'I won't bring my ideas up, they'll only be shut down'
- ...people's sense of responsibility evaporates; unable to act on their own initiative
- ...they lose sense of ownership and accountability for their performance
- ...erodes pride
- ...undermines the leader's prime tool-motivating people by showing them how their job fits into a grand, shared mission= diminished clarity and commitment

THE AUTHORITATIVE STYLE

- ...visionary
- ...motivates people by making clear to them how their work fits into a larger vision for the organization, so that people understand what they do matters and why = purpose & engagement
- ...maximizes commitment to the organization's goals and strategy, the standards for the success are clear and also the rewards= high performance
- ...gives people freedom to innovate, experiment and take calculated risks= ownership & accountability

THE AFFILIATIVE STYLE

- ...revolves around people, values individuals & emotions more than tasks and goals
- ...strives to keeps employees happy and to create harmony among them
- ...builds strong emotional bonds=loyalty
- ...has positive effect on communication= sharing of ideas & inspiration
- ...gives people freedom to do their own job & drives flexibility & trust= allowing innovation and risk taking
- ...masters of building a sense of belonging
- ...rarely offers constructive advice on how to improve

THE DEMOCRATIC STYLE

- ...invests time getting people's ideas and buy-in
- ...builds trust, respect and commitment
- ...letting people have a say in decision
- ...builds strong emotional bonds=loyalty
- ...drives up responsibility and accountability
- ...can escalate conflicts, create endless meetings w/o consensus= feeling of confusion and leaderless

THE PACESETTING STYLE

- ...sets extremely high performance standards and exemplifies them him/herself
- ...obsessive about doing things better and faster, asks the same everyone around
- ...quickly pinpoints poor performers and demands more from them, if necessary replaces them
- ...destroys climate, employees feel overwhelmed by the demands of excellence and the morale drops
- ...people feel untrusted= flexibility & responsibility evaporate, work becomes task-focused and boring
- ...gives no feedback,
- ...commitment dwindles under the regime of pacesetting leader because people have no sense of how their personal efforts fit into the big picture

THE COACHING STYLE

- ...helps employees identify their unique strengths and weaknesses & ties them to their personal and career aspirations
- ...encourages employees to establish long-term develoment goals help them conceptualize a plan for attaining them
- ...excels at delegating, gives employees challenging assignments even if that means the tasks won't be accomplished quickly
- ...willing to pu-up w short-term failure if it furthers long-term learning
- ...primarily focuses on personal development, not on immediate work-related tasks
- ...requires constant dialogue
- ...positive impact on performance and climate= the implicit message is 'I believe in you, I'm investing in you, and I expect your best efforts'

THE EFFECTIVE LEADERS…

- Leaders who have mastered four or more- especially authoritative, democratic, affiliative and coaching styles- have the very best climate and business performance.

- They don't mechanically match their style to fit a checklist of situations, they are far more fluid. They are sensitive to the impact they are having on others and adjust their styles to get the best results.

- For instance; They can read in the first minutes of the conversation that a talented but underperforming employee has been demoralized by an unsympathetic, do-it-the way I tell you manager and needs to be inspired through a reminder of why her work matters = **EQ!**

CASE I:

- A computer company was in a crisis mode- its sales and profits were falling, the shareholders were in a uproar. The board brought a new CEO with a reputation as a turnaround artist.
  - He set to work chopping jobs, selling off divisions and making the tough decisions that have been executed years before.
  - He created a reign of terror, roaring his displeasure at the slightest misstep.
  - Defections from all levels due to bullying and demeaning.
  - The company was saved, at least in the short-term.

CASE I: *Coercive Style!*

- The outcomes:
  - The CEO's direct reports frightened by his tendency to blame, thus they stopped bringing him any news at all
  - Morale was all-time low
  - Commitment was suffering
  - Resignations of critical people
- The CEO was eventually fired by the BoD.
- This style should be used only in extreme caution and in few situations like turnaround or genuine emergency.
  - This style can break failed business habits and shock people into new ways of working.

CASE II:

- Sam was a superb technical expert in a large pharma company.
  - He got promoted as the head of a team developing new products
  - The other scientists on the team were also competent and self motivated like Sam
  - A new assignment came and Sam needed to articulate a vision, coordinate projects, delegate responsibility and help others
  - Sam began to slip;
    - not trusting his subordinates were as capable as he was
    - became a micromanager
    - became obsessive and taking over for others when their performance slackened

CASE II: *Pacesetting Style!*

- The outcomes:
  - Instead of trusting his subordinates' to improve with guidance and development, he started working for the entire assignment
  - Sam found himself working nights and weekends
  - Sam's own boss suggested that Sam return to his old job

- This style works well when all employees are self-motivated, highly competent and need little direction or coordination, like R&D groups and legal teams.
  - It gets 'work done done on time, even ahead of schedule.'
  - Pacesetting should never be used by itself like any leadership style

A CASTLE CAN ONLY HAVE ONE KING
THE LAST CASTLE
